Project Details

Has a startup company been established for this project?

Has the project or company raised any external equity investment, including convertible notes or SAFEs?

What is the nominated Fellow's current appointment end date, and what is the intended pathway beyond the program period? (50 words)

Technology Type

Field of research

Cancer, cell therapy, other disease indication, biomanufacturing, etc.

Nominated Fellow Details

What entrepreneurial experience do you have? This can include a startup of your own, an accelerator or commercialisation program, a side project, or anything else you have started or built. (100 words)

Participating means approximately one day a week with Proto Axiom for twelve months, alongside your existing role. How do you plan to manage this, and what will take lower priority? (100 words)

Project Proposal

What is your elevator pitch? (200 words)

Please attach a recent presentation or pitch deck at the end of your application.

What specific problem are you trying to solve? (200 words)

How are you solving the problem? (200 words)

What is the current solution/standard of care? (200 words)

How is your technology differentiated from competitors in a way that drives commercial traction? Include any comparative data you have; where you don’t yet have it, say what evidence would be needed to establish the advantage. (300 words)

What is your research progress to date? (200 words)

What are potential alternative uses of your technology (if applicable)? (200 words)

What are the next steps and/or experiments in your program? (200 words)

What are the proposed use of funds? Provide a cost estimate against each of the next steps described above. If requesting salary support (up to $20,000, matched dollar-for-dollar from the project lead’s own cash funding), state the amount and source of the match. (300 words)

What would success look like for this project at the end of 12 months? Be specific about the commercial inflection point you are aiming to reach, and what evidence would demonstrate it. (200 words)

What is your IP protection status (list patent number, if applicable)? (100 words)
